PROFILE

Data Analyst fresher with a B.Sc in Computer Science. I build Power BI and Excel dashboards on manufacturing and retail data. I clean the data, model the tables, write the DAX measures, design the pages and write down findings and recommended actions. Looking for a Data Analyst or Junior Data Analyst role.

PROJECTS

AeroHome Manufacturing Dashboard Power BI, DAX

- 9-page report on a 4-plant manufacturer: production, downtime, quality, energy, cost, suppliers, materials and operators.
- Wrote DAX measures (Production Achievement %, Defect Rate, Downtime per 1000 Units, Delay Rate). Found material shortage as the top downtime reason and a 544M defect cost exposure.

NovaTech MFG Intelligence Power BI, DAX

- 7-page report on 5 plants and 10 products, 2024 to 2025: production, defects, downtime, energy, suppliers, margin and materials.
- Showed one supplier with the highest delay rate and one plant with the highest energy per unit.

TrendMart Profitability Leakage Analysis Excel

- Retail workbook with 3,000 transactions: pivot tables, XLOOKUP, slicers and a 10-chart dashboard. Logged 23 data quality issues across 5 sheets.
- Found profit down 7.2% versus last year with flat sales (margin 19.56%); recommended actions on low-margin top sellers and returns.

FreshMart Profitability Leakage Analysis Excel

- Supermarket workbook with 2,500 orders: category, product and store target analysis in pivot tables and charts.
- Found Bakery with the best margin (38.9%) and Rice the lowest (14.8%); recommended promoting high-margin categories.
